The rejection of the present claims over the primary reference to JP2004051649 is withdrawn since JP 2004051649 is not available as prior art.

The search has been updated. The new IDS have been considered.

No prior art has been presented or found that either teaches or makes obvious a graft copolymer having a structure in which a vinyl polymer segment formed from a vinyl monomer having an acid group is suspended in a molecular chain of polyolefin resin segment via a beta-substituted propylene group for independent claim 1; nor in the method claims for producing said graft copolymer by reacting a vinyl monomer having an acid group with polyolefin resin having a beta-substituted propenyl group as a pendant, wherein the polyolefin resin having a beta-substituted propenyl group as a pendant is produced by reaction an addition-fragmentation chain transfer agent with polyolefin resin.

Claims 1-9 and 12-20 are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
